About CyberLab

We are a UK-leading cyber security consultancy and managed services provider, trusted by over 1,200 enterprise businesses, government departments, and household names to secure their operations, systems and data.

With more than 30 years of combined expertise, we take a deeply consultative, partnership-led approach, guiding clients and partners at every stage of their journey.

Our strength lies in our people – highly accredited consultants, CREST and CHECK-approved penetration testers, and cyber specialists who turn your risk into clear, strategic action.

Cyber security is one of the fastest-growing sectors in the UK, currently valued at £14.7bn a year.

As a CyberLab partner, you can tap directly into that growth with a ready-made suite of services and products for your customer base.

CyberLab Partner Solutions

A single partner relationship gives you access to a wide range of cyber security products and services – from one-off assessments to annual certifications and continuous monitoring.

Certifications

- Cyber Essentials / Plus
- IASME Cyber Assurance
- PCI DSS Consultancy

People & Resilience

- Tabletop Exercises
- NIST CSF 2.0 Assessment

Security Testing

- Posture Assessments
- Penetration Testing
- Red Teaming
- Cloud Security Assessments

HackRisk

- Dark Web Scan
- Recon Scan
- Vulnerability Scan
- Supply Chain Risk
- Phishing Simulation
- Security Awareness Training

Cyber Essentials & Cyber Essentials Plus

Cyber Essentials is the UK government-backed certification scheme that helps organisations defend against 80% of cyber attacks through five technical controls.

Cyber Essentials Plus builds on the base certification with an auditor verifying that the controls are in place.

As an IASME-approved assessor, CyberLab can support your customers through certification with optional pre-assessment checks and consultancy.

Why Choose CyberLab

IASME Accredited

As an IASME-approved assessor, we're expertly placed to guide your customers through the certification process.

4.9/5 Trustpilot Rating

Our Cyber Essentials customers have rated us 4.9/5 on Trustpilot, with all our 180+ reviews Excellent or above.

1,500+ Certifications

We've awarded over 1,500 Cyber Essentials and Cyber Essentials Plus accreditations.

100% UK-Based

All our experts are based within the United Kingdom, ensuring quality, consistency, and transparency.

Assurance & Compliance

Beyond Cyber Essentials, many of your customers need to demonstrate a deeper or more specific standard of compliance – for a contract, a regulator, or their own supply chain.

IASME Cyber Assurance

A globally recognised, holistic standard covering people, process and technology – going further than the Cyber Essentials controls to assess an organisation's overall security governance.

As an IASME-approved assessor, we support your customers through the full assessment.

PCI DSS Consultancy

For any customer that stores, processes or transmits payment card data, PCI DSS compliance is mandatory.

Our consultants help scope the assessment, close the gaps, and maintain compliance year on year.

NIST CSF 2.0

The NIST Cybersecurity Framework is one of the most widely used maturity frameworks in the world, assessing an organisation across five core functions: Identify, Protect, Detect, Respond and Recover.

Our assessment gives customers a clear maturity score and a prioritised roadmap for improvement.

Penetration Testing

Penetration testing is a controlled cyber attack carried out by certified ethical hackers to find and exploit vulnerabilities in infrastructure, applications, cloud and APIs before real attackers can.

Our CREST-accredited penetration testers think like real attackers – probing networks, applications and infrastructure to find the weaknesses a malicious actor would exploit, before they do.

Penetration testing is a high-trust, high-value engagement that deepens the relationship and naturally leads into ongoing managed services.

Why Choose CyberLab

Unmatched Expertise

Our 14-strong UK-based team, includes 7 CHECK Team Leaders, 6 CTMs, and SC/NPPV3-cleared consultants.

Proven Track Record

Over a decade of high-stakes testing for public sector and regulated industries, building on our Armadillo Sec heritage

Trusted by 1,200+ Organisations

Including NHS, local authorities, housing, manufacturing, education, and financial services.

Rapid Response

Next-day testing for compliance deadlines, audits, and urgent stakeholder needs.

Specialist Testing Services

For customers with more complex environments or higher regulatory exposure, our specialist testing and assurance services go beyond a standard test.

Red Teaming

Simulated scenario-led attacks that test people, process and technology together.

Cloud & MS365 Testing

Uncover exploitable weaknesses in cloud environments.

Social Engineering

Assess human-layer vulnerabilities with ethical simulations.

Infrastructure Penetration Testing

Uncover exploitable weaknesses in infrastructure.

Operational Technology Penetration Testing

Assess technology in manufacturing and CNI environments.

IT Health Check

A CHECK approved ITHC is a penetration test audited by the NCSC.

Web Application Testing

Simulated scenario-led attacks that test people, process and technology together.

API Penetration Testing

Threat-led assessments of API authentication, authorisation, and data flows.

Build Reviews

Assess operating system and device configurations against industry benchmarks.

Your early warning system for cyber risk

HackRisk is our AI-powered risk monitoring SaaS platform, purpose-built for SMEs and MSPs.

It gives your customers continuous, automated visibility of the risks that matter most – dark web exposure, attack surface, vulnerabilities, and human risk – in one portal.

With a free 30-day trial for every user and built-in upsell pathways, HackRisk is an easy addition to any service you provide.

HackRisk Score

A* - F

A Hack Risk Score is like a credit score for cyber security. One number that tells your customers everything they need to know about their security posture.

As they reduce risks in their environment, their HackRisk Score will decrease.

HackRisk Report

BOARD-READY

Our automated threat reports present findings and provide actionable recommendations that can be communicated across an organisation.

Providing a complete breakdown of every finding and AI-powered resolution advice, HackRisk Reports are shareable and ready to show to the board.

The HackRisk Modules

SIX SERVICES · ONE SCORE

Dark Web Scan

Billions of usernames and passwords are for bought and sold on the dark web. HackRisk continuously scans for your customers' stolen credentials, identifies which breaches exposed them, and recommends the action to take.

Recon Scan

Mapping every subdomain, endpoint, API and IP address associated with an organisation, then scanning that attack surface for known vulnerabilities and misconfigurations.

Vulnerability Scan

Regularly scans customer systems for emerging vulnerabilities, pinpointing weaknesses before they can be exploited.

Security Awareness Training

Personalised, interactive training with manager digests and performance tracking, so non-technical staff build genuine security awareness.

Phishing Simulation

Safe, realistic phishing simulations that turn employees from the weakest link into the first line of defence.

Supply Chain Risk

Extends visibility beyond the customer's own perimeter to the third parties they depend on.

Working with CyberLab

Every partner is different, so we offer a range ways to work with us.

Your named CyberLab account manager will help you find the right fit – and you can move between models as your business grows.

Channel Partner

Resell CyberLab products under your own commercial terms, with our technical and marketing support behind you.

Best for MSPs and MSSPs adding cyber security services to an existing customer base.

Referral Partner

The simplest option – introduce us to a lead, and we handle everything from there in exchange for a referral fee.

No ongoing commitment

HackRisk Affiliate

Monetise your audience with a commission-based model.

Refer customers to HackRisk and earn automatic commission

Getting Started

We keep onboarding as simple as possible, so you can start generating revenue as quickly as you can.

1.

Choose your way of working

Meet your account manager and agree the right partnership model.

2.

Partner agreement

Straightforward commercial terms tailored to your chosen model.

3.

Completion call

We'll join you on a call to check everything is in place before you go live.

Get in touch with your account manager to register as a CyberLab Partner, or if you have any questions about the Partner Programme in general.
