

# Does Your Cloud Service Accept Card Payments for Renewals?

If you process or store cardholder data even for subscription renewals, you **must comply with PCI DSS**.

The **Payment Card Industry Data Security Standard (PCI DSS)** ensures that sensitive payment information is protected from breaches and fraud.

## Why Is PCI DSS Compliance Critical for Cloud Services?

- **Recurring payments** increase exposure to cardholder data.
- Non-compliance can lead to **hefty fines, data breaches, and loss of customer trust**.
- Cloud environments require **additional controls** for multi-tenant security and data isolation.

## What Does Compliance Look Like for Cloud Services?

- Secure your **payment gateway and APIs**.
- Implement **strong encryption** for data in transit and at rest.
- Enforce **access controls and monitoring** across your cloud infrastructure.
- Conduct **regular vulnerability scans and penetration tests**.
- Maintain **incident response and data protection policies**.

## Cyberlab Can Help?

We specialise in **PCI DSS consultancy for cloud-based businesses, offering:**

- **Gap analysis and risk assessment**
- Guidance on **SAOs for service providers**
- Technical and procedural remediation
- Ongoing compliance support

**Stay compliant. Stay secure..**

Contact Cyberlab today to simplify PCI DSS compliance for your cloud service.

## Your Trusted Security Partner

CyberLab is a CREST, CHECK and NCSC accredited cyber consultancy and managed service provider, trusted by over 1,200 organisations. With over 30 years of experience in the industry, we deliver expert-led penetration testing, compliance, and strategic support.

**Protecting the nation, business and people.**
