

Do You Have an E-Commerce Website?

If you accept card payments online, **PCI DSS compliance isn't optional, it's mandatory.**

The **Payment Card Industry Data Security Standard (PCI DSS)** is designed to protect cardholder data and prevent costly breaches.

Why Should You Care?

Failure to comply can lead to:

- **Financial penalties** from card brands
- **Data breaches** and reputational damage
- **Loss of customer trust**

What Does Compliance Involve?

PCI DSS requires businesses to:

- Secure payment systems and hosting environments
- Implement **firewalls, encryption, and strong access controls**
- Conduct **regular vulnerability scans and penetration tests**
- Maintain **policies and procedures for data protection**

How Cyberlab Can Help?

Achieving compliance can be complex—but you don't have to do it alone.

Cyberlab offers PCI DSS consultancy services including:

- **Gap analysis** and risk assessment
- Guidance on **Self-Assessment Questionnaires (SAQs)**
- Technical and procedural remediation
- Ongoing compliance support

Protect your website. Protect your customers. Protect your business.
Contact Cyberlab today to simplify PCI DSS compliance.
